

NewTelco's strategically located data centers offer highly flexible equipment housing (from unit to dedicated cage), providing our customers with direct access to the largest European telecommunication hub and 450+ network operators, ISPs, content providers and other telcos. NewTelco has its own advanced data centers in Frankfurt am Main (Germany), Kiev (Ukraine) and Tbilisi (Georgia). The services are available at the most important telecom locations around the globe, including Amsterdam, Hong Kong, London, Stockholm, Vienna, etc.
